Pasting an image from the clipboard

You can add graphics to Adobe PDF documents by copying an image from another PDF document or another application, and then pasting it in your PDF document as an image comment. If you want to add the image to PDF documents repeatedly, you may want to create a custom stamp of the image. (See Creating custom stamps.)

To paste an image from the clipboard:

1. In any application that contains graphics, select an image, and then choose Edit > Copy. Use the Select Image tool ➤ to select and copy an image in a PDF document. (See Copying images.)
2. Open the PDF document in which you want to paste the image.
3. Choose Paste Clipboard Image from the Attachments menu on the Commenting toolbar.
4. Click where you want the image to appear.
5. Do any of the following:

- Using the Hand tool 🖐, drag the image to move it, or drag one of its handles to resize it.
- To change its properties, right-click (Windows) or Control-click (Mac OS) the image, and then choose Properties.
- To delete the image, right-click (Windows) or Control-click (Mac OS) the image, and then choose Delete Comment.
