Manitoba Neuroscience Network Seminar Series

Friday, September 27nd, 2013 | 9:00 am

Dr. Melanie Martin

Associate Professor - Department of Physics University of Winnipeg Adjunct Professor - Department of Pharmacology & Therapeutics, University of Manitoba

Topic: Using MRI to find early biomarkers for CNS disorders.

Location: PX236/238, Psychiatry Bldg. Bannatyne Campus

Brief Biosketch:

As a physicist specializing in magnetic resonance imaging (MRI), I am developing a non-invasive, empirical method to diagnose Alzheimer's disease, Multiple Sclerosis, and other central nervous systems disorders as early as possible. I am also using MRI to follow the effectiveness of treatment regimes over the course of time.
