

Manitoba Neuroscience Network

2015/2016 Seminar & Visiting Speaker Series

Friday, September 25th, 2015 9:00 a.m.

Marc Del Bigio, MD, PhD, FRCPC

Professor - Department of Pathology,
Professor - Department of Human Anatomy & Cell Sciences,
College of Medicine, Faculty of Health Sciences,
University of Manitoba;
Canada Research Chair in Developmental Neuropathology

Topic: Pharmacologic Therapy for Hydrocephalus - Past and Future

Location: PX236/238 PsycHealth Bldg., Bannatyne Campus

Learning objectives:

- Understand the pathogenesis of brain damage caused by hydrocephalus
- Understand how different rationale drug interventions have so far failed to make a difference and what new approaches are being explored.

Biosketch:

MD 1982, PhD 1987, FRCPC (Neuropathology) 1993.

Dr. Del Bigio is clinical & experimental neuropathologist who has been studying hydrocephalus since 1984. His research interests also include brain damage following premature birth and brain damage due to substance abuse (e.g. alcohol, toluene).
