Stacey Woods, Extended Education

**From:** Greg Kowk, Manager & Chief Power Engineer

**Subject:** *Steam Plant Shut Down – Final Announcement*

We are proposing our yearly steam distribution shut down at the Fort Garry Campus during the following period:

<b>SHUT DOWN</b>	Sunday, June 11, 2023	18:00 hours
<b>START UP</b>	Monday, June 19, 2023	08:00 hours

This is essential for annual maintenance requirements. During this time frame, we will be providing domestic hot water where electric hot water stand-by heaters are available. Air conditioning, as well as normal building ventilation, will continue to operate during the shutdown.

**Steam at 75 lbs psi will be available again by Tuesday, June 20, 2023 at 08:00 hours**

If you have any questions or concerns about this proposed schedule, please feel free to contact me. Your cooperation and understanding during this interruption is very much appreciated.

Regards,

*Greg Kowk*
