APPLY TODAY!

The *rare* Charitable Research Reserve has partnered with the Ages Foundation Fund to financially assist students in pursuit of higher education. The Ages Foundation Research Fellowship & Bursaries program will allow students to study in a relatively undisturbed, yet highly accessible site in Waterloo Region. Applications that utilize multiple knowledge systems and diverse methodologies will be prioritized. The monetary awards will help ensure successful candidates have the necessary resources to conduct and report on their research at *rare*.

We support diverse, inclusive and equitable practices and approaches to environmental issues as we work toward meaningful reconciliation with Indigenous Peoples (self-identified and status First Nations, Métis & Inuit) of Turtle Island. We encourage applications from Indigenous students utilizing Indigenous and/or Western knowledge systems and methodologies.

We recognize that historical and present-day barriers exist that disadvantage Black, Indigenous, and other People of Colour (BIPOC) pursuing higher education. To support BIPOC graduate students making environmental contributions through science, art, and diverse inquiry, the Ages Foundation Fellowship includes a designated \$5,000 BIPOC award.

Eligibility:

- **Must be enrolled as a graduate student in a Canadian or International institution.**
- **Research or project must occur at least in part between May 2021 and April 2022.**
- **Research must be environment focused and should utilize *rare* as a field site, case study, or another form of partnership.**
