and Global Health

Applied Epidemiology and Public Health

Course Code: CHSC 2000

CHSC 2000 Applied Epidemiology and Public Health 3 cr This course offers a foundational understanding of the principles and methods used to study the distribution and determinants of health and disease in populations. Students will learn to analyze patterns of illness, assess risk factors, and interpret epidemiological data to inform public health decisions. Emphasis is placed on applying epidemiological thinking to community and global health challenges. Must be enrolled at the Undergraduate level.
