

The Aurora Modernization Project continues to roll out new functionality incrementally, introducing **additional security, new features, and opportunities to implement more frequent upgrades into the future.** Phase 2 consultation began in November 2024, focusing on features that directly impact faculty and staff.

## Find your way! Aurora Classic vs. New Aurora for Faculty & Staff

- Always start from the [Aurora launch page](#)!
- Cards on the launch page will bring you to the most current location for information, which may still be Aurora Classic.
- Functions will transition incrementally to New Aurora over the coming year.

### What to expect in 2025:

- **Grade Entry:** functionality related to grade entry, change of grade, and grade approvals will be moving to New Aurora in 2025. Consultations with representative faculty and staff are ongoing.
- **Class Lists:** also moving to New Aurora in 2025! Discussions include opportunities to display student photos and other information.

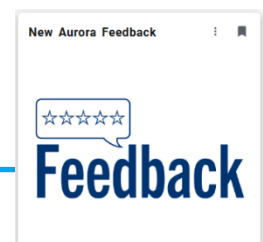

## What's New for Students?

### Registration moved to New Aurora in November 2024!

**Tuition Fee Appeal request form:** a new online form will trigger a workflow and improve status update notifications. Targeted to be released in February 2025.

**My Exams card:** coming mid-February, a new card on the Aurora launch page will display a personalized exam schedule for the current term.

**New Aurora Feedback:** students can share their thoughts about using New Aurora by completing an online form from the launch page.
