# Aurora Modernization Project

NEW AURORA LAUNCH IN 2024

Starting in March 2024, New Aurora functionality for students will be rolled out incrementally and introduced at different points throughout the year.

The first new features will include the **New Aurora launch page** which will serve as a single sign-on hub for students to access essential tools and resources, including UM Learn, UM Achieve, and course registration.

New system bringing students to old functionality? Not to worry – this is temporary! During the transition period, the launch page will continue to link students to current functionality in the existing Aurora Self Service system, which will be moved incrementally to the new Aurora.

Proposed Timeline

March 2024
Introduce New Aurora launch page

TBD — TBD — TBD — TBD

Phased roll-out of user features to be finalized

November 2024
Introduce new Registration functionality

PHASE 2: FACULTY AND STAFF EXPERIENCE

Work will be starting in the spring on the second phase of the project, focused on the faculty and staff experience. Functionality to be addressed in this phase includes grade entry, class lists new unofficial transcript and student reporting.
