

Conceptual Design for a Pedestrian Link over the Red River to the University of Manitoba

Notice of Public Interactive Display Session - February 8 & 9

MMM Group Limited (MMM) is currently working with the City of Winnipeg to provide professional consulting services for a conceptual design study to identify options and a location for a pedestrian and cycle crossing over the Red River to connect St. Vital with Fort Garry in the vicinity of the University of Manitoba.

We are looking for public input into the project to determine the possible location and type of river crossing structure for the area.

Have Your Say

MMM, along with the City of Winnipeg, will be hosting two Public Interactive Display Sessions to collect feedback from the public. As well, an on-line survey is available at:

<https://www.surveymonkey.com/s/activetransport>
