Brian Patterson, M.A. Planning – Urban Systems, Vancouver

Moving From Plan to Action

- Winnipeg recently adopted its first ever Pedestrian and Cycling Strategies. This presentation will highlight some of the key issues and challenges for walking and cycling in Winnipeg, and include a discussion on how the City can move to action to implement the recommendations of the Strategies

The Toolkit

- This presentation will summarize the tools that the City has available to encourage walking and cycling, and will summarize these in terms of the Five E's of Engineering, Education, Encouragement, Enforcement and Evaluation.

Luis Miranda-Moreno Ph.D, P. Eng – McGill University, Montreal

Topics Covered

- Automated data collection methods for active transportation
 - Active transportation related technologies, extrapolations and recent developments
 - Methods for road safety in the context of non-motorized transportation
 - Role of geometry and other active transportation treatments
