

PUBLIC OPEN HOUSE

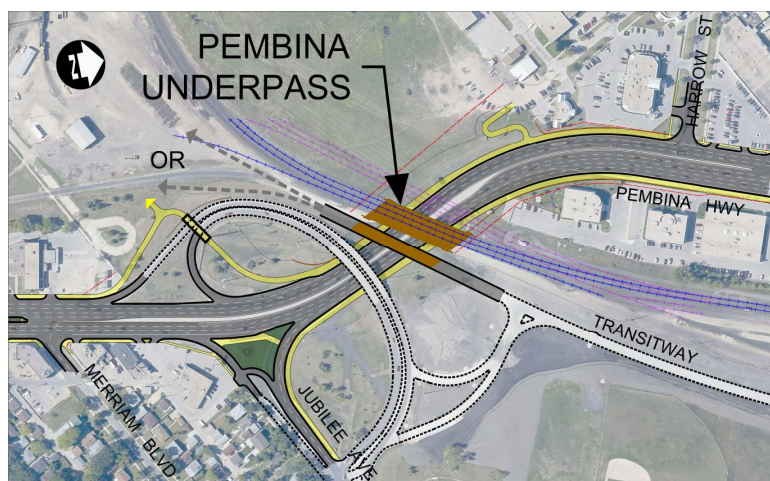

Preliminary Engineering Study to Upgrade the Pembina Highway Underpass

We invite you to attend a Public Open House to review and provide feedback on three options being proposed for improvements to the Pembina Highway Underpass.

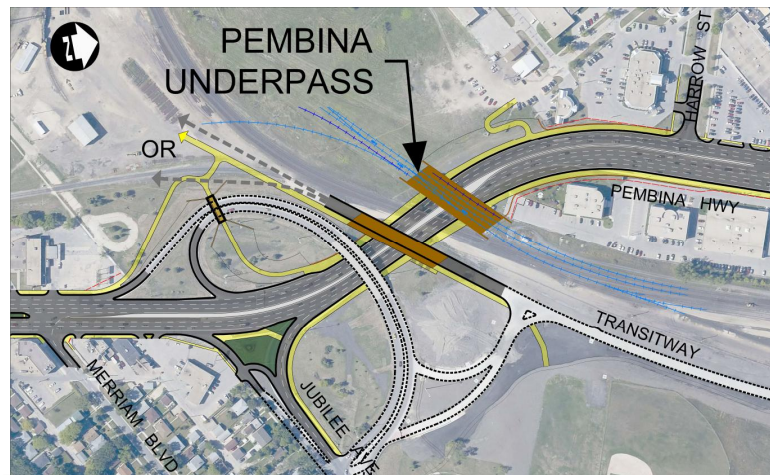

Option #1

Remove the existing sidewalk on east side of the underpass to provide space for a third northbound lane. Construct pedestrian and cycle paths on the east and west side of underpass by tunneling through the existing railway embankment.

Option #2

Replace the existing railway bridge with a new bridge in the same location to provide space for third lane northbound and increase lane widths on the existing lanes. Construct pedestrian and cycle paths on the east and west side of Pembina within the street right of way.

Option #3

Replace the existing railway bridge with a new bridge on a new alignment to the north to provide space for third lane northbound and increase lane widths on existing lanes. Construct pedestrian and cycle paths on the east and west side of Pembina within the street right of way.

Date: Wednesday May 9, 2012 Time: 4:00 PM to 8:00 PM (drop-in format)

Location: Association of Professional Engineers and Geoscientists of the Province of Manitoba (APEGM)
870 Pembina Highway, Winnipeg, Manitoba
