**FACULTY POSITION
No. 22360
IN OCCUPATIONAL HEALTH
AND HUMAN TOXICOLOGY**

Université Laval, the first French-language higher-education institution in the Americas, and the Department of Social and Preventive Medicine of its Faculty of Medicine are seeking a tenure-track professor in *occupational health and human toxicology*. The selected candidate will have a strong background in training and expertise (teaching–research) closely related to public health / community health / population health. This position leads to tenure.

POSITION DESCRIPTION

The selected candidate will hold a full-time, 100% tenure-track professorship in the Department of Social and Preventive Medicine of the Faculty of Medicine. He or she will be expected to demonstrate strong leadership in teaching occupational health and human toxicology in undergraduate, master's, and doctoral programs for which the Faculty of Medicine is responsible—specifically the specialized graduate diploma (DESS) in occupational health and safety, and the joint faculty master's and doctoral programs in public and community health related to occupational health and human toxicology.

He or she will also be active in the development and execution of funded research projects in community health / public health / population health, and contribute to strengthening expertise in occupational health or human toxicology within the Faculty and in collaboration with other faculties. Duties also include supervising or co-supervising graduate students and postdoctoral fellows, as well as participating in faculty, university, and professional activities relevant to the position.

QUALIFICATIONS

Eligible candidates must:

- Hold a Ph.D. relevant to occupational health and human toxicology;
- Has completed a post-doctoral fellowship of at least two (2) years in a field relevant to the position;
- Demonstrate strong skills in university-level teaching in occupational health and in human toxicology and the supervision of graduate students;
- Demonstrate strong ability to conduct research activities in occupational health or human toxicology, addressing related issues, and to publish findings in peer-reviewed scientific journals;
- Demonstrate strong collegiality and interdisciplinary collaboration skills;
- Be able to integrate new information and communication technologies into their teaching;
- As Université Laval is a French-language institution, the selected candidate must be able to teach in French or commit to being able to do so within three (3) years.

SPECIAL NOTES

Located in the heart of Québec City, Université Laval offers an exceptional living environment. It is a comprehensive university recognized for its culture of excellence in teaching and research.

Promoting equity, diversity, and excellence, Université Laval is committed to providing all staff members with an inclusive environment. The University values diversity as a source of richness and encourages qualified individuals of any origin, gender, sexual orientation, gender identity or expression, and persons with disabilities to apply.

Université Laval also subscribes to an employment equity program for women, visible minorities, ethnic minorities, Indigenous peoples, and persons with disabilities. Selection tools can be adapted in full confidentiality based on individual needs. In accordance with Canadian immigration requirements, priority will be given to qualified candidates who are Canadian citizens or permanent residents.

APPOINTMENT AND COMPENSATION

Salary according to the current collective agreement.

DURATION OF JOB POSTING

From June 5 to September 30, 2026

START DATE

January 3rd, 2027

APPLICATION SUBMISSION

Please send, by email, before October 1st 2026 at midnight:

- a cover letter;
- a detailed curriculum vitae;
- a two (2) pages maximum document describing the research program planned for the next five (5) years;
- a document of no more than half a page (1/2) summarizing the teaching philosophy;
- the names of three (3) referees to the candidate.
