## *AXIUM RDS CONNECTION INSTRUCTIONS*

---

1. Double click on “axiUm.rdp” link.

2. Click on “Connect” when the RemoteApp box appears

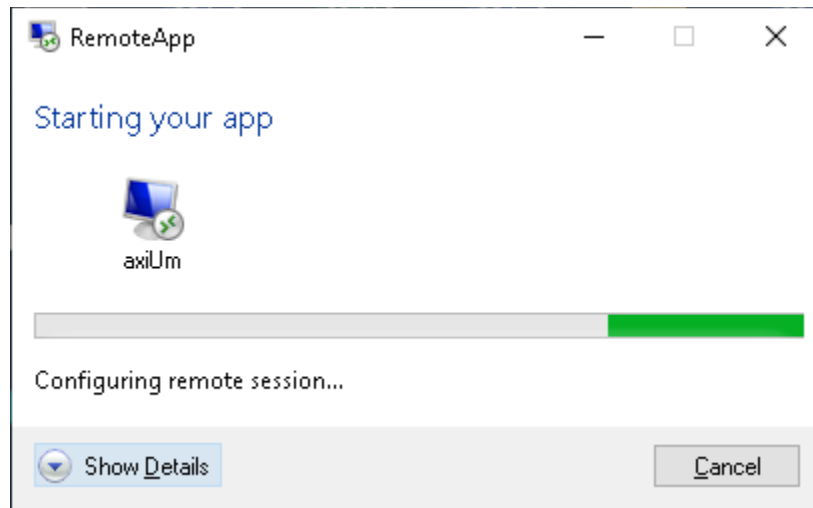

3. Select "Use a different account" and enter in your [xxxxx@myumanitoba.ca](mailto:xxxxx@myumanitoba.ca) (Student Credentials) or `ad\UMNetID` (Staff Credentials), enter in Password, and click "OK".

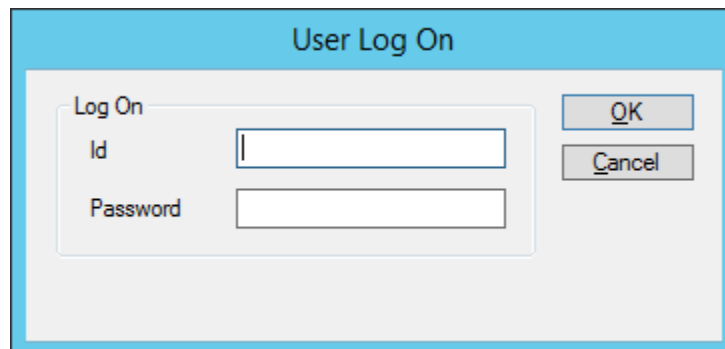

The image shows a Windows Security dialog box titled "Enter your credentials". The dialog is for connecting to the domain `contour.ad.umanitoba.ca`. It contains two input fields: one for the username, which has `xxxxx@myumanitoba.ca` entered, and one for the password, which is currently empty. Below the password field, the domain is listed as `Domain: myumanitoba.ca`. There is an unchecked checkbox labeled "Remember me". Under the heading "More choices", there are two options: a button with a person icon and a white text box, and a blue button with a person icon and the text "Use a different account". At the bottom of the dialog are two buttons: "OK" and "Cancel".

\*\*\* You will then see the following appear on the screen while the connection is being established.

4. Once the AxiUM "User Log on" pop-up windows appears, enter in AxiUM Credentials and click "OK". This should then open the AxiUM window.

---

### *Disconnecting from AxiUM RDS Connection*

---

\*\*\* When exiting AxiUM, close the AxiUm window and ensure to disconnect from the “contour.ad.umanitoba.ca” connection.

**If you are on an Apple Mac, here are other instructions to help you connect.**

Same instructions for VPN.

Save the axiUmRDS.rdp file to your computer

Launch the app and click Continue on the certificate warning screen.

Sign in with your xxxxx@myumanitoba.ca UMNetID and password, when prompted.

Click OK on the blue window

axiUm should launch and use your axiUm credentials to login.
