

# "ENDODONTICS WITHOUT FEAR: A SIMPLIFIED APPROACH FOR GENERAL DENTISTS"

February 28<sup>th</sup>, 2026 – Saturday from 9a.m. to 4p.m.  
Canadian Museum for Human Rights

LIMITED  
SPOTS  
AVAILABLE

## Course Description:

This practical, confidence-building course is designed for general dentists who want to improve their endodontic skills, streamline their techniques, and achieve predictable clinical outcomes. Through a clear, step-by-step approach, participants will learn how to diagnose pulpal and periapical conditions accurately, select appropriate cases, and perform root canal treatment efficiently and safely.

The course demystifies common challenges—such as canal location, instrumentation, irrigation, and obturation—by breaking them down into easy-to-follow protocols that fit seamlessly into a general practice workflow. Emphasis is placed on clinical decision-making, avoidance of procedural errors, and the use of modern tools and materials that enhance both quality and confidence.

Whether you are new to endodontics or looking to refine your current technique, this course provides the knowledge, tips, and practical strategies needed to perform endodontic treatment with less stress, greater consistency, and improved patient outcomes.

## Content Topics:

1. Case Selection & Diagnosis
2. Access Cavity Preparation Made Simple
3. Canal Instrumentation Essentials
4. Irrigation Protocols That Work
5. Obturation Techniques for Predictability
6. Endodontic Materials & Equipment Update
7. Managing Complications Without Fear
8. Restoring the Endodontically Treated Tooth
9. Workflow & Efficiency Tips for General Dentists

## Dr. Mario Zuolo

- DDS degree at Faculdade de Odontologia de Ribeirão Preto — USP (University of São Paulo) - 1981
