STUDENTSHIP AWARD**

FHNS RETREAT

GLENLEA RESEARCH STATION

27 August, 2024

OPPORTUNITY TO MEET AND GREET

This year's retreat provided a great opportunity not only for faculty, technicians and support staff to reconnect after the summer break, but also to address the important challenges FHNS department faced and struggled in the previous academic year. Credit should go to the chairs of Safety, Research, Graduate, Dietetics, and Communication & Outreach Committee as they provided 10 discussion questions in advance. Thanks also go to all the attendees for sharing their experience, expertise, and perspectives in tackling various issues, ranging from stressors identification, resources allocation, marketing strategies formulation, and administrative policy recommendations.

>>> MORE PHOTOS

GLENLEA Research Station is a modern research facility hosting structures and services necessary to support the Faculty's research, training and outreach program.
