Facility Based - Clinical Dietitian

As a Facility-Based Clinical Dietitian, you develop and implement nutrition care plans in acute and long term care settings; with some areas also offering hemodialysis and/or outpatient dietitian services. The diverse patient population fosters a broad range of dietitian experience including acute care, geriatric nutrition, one-to-one client outpatient services, group education and menu planning. This position provides the opportunity to work directly with doctors, nurses and other allied health professionals in a variety of settings.

Chronic Disease Education Program

The Chronic Disease Education Program is a team of Registered Dietitians and Registered Nurses who obtain and maintain their certification in diabetes education. They work collaboratively to deliver self-management supports, clinical expertise in chronic disease management and health promotion through communities and the health care system.

Qualifications

- Baccalaureate Degree in Human Ecology, major in Human Nutritional Sciences or equivalent
- Completion of an accredited dietetic internship program
- Membership in good standing with the College of Dietitians of Manitoba
