

Oral cancer screening pop-up clinic

Monday, February 2, 2026 | 9:00 AM – 4:00 PM

William Street Main Entrance of HSC in Room SR178, located next to the Gift Shop

Early detection of precancerous lesions or oral (mouth) cancer is important. The prevalence of these conditions are on the rise and can even be seen in younger people. When caught early, there is a greater chance for a cure and can save lives.

The **FREE** oral cancer screenings take about 10 minutes and are conducted by licensed oral health professionals from UM's Dr. Gerald Niznick College of Dentistry.

Register today!

Follow the QR code or link below to register and reserve a specific time: <https://bit.ly/4sy1eDY>

Walk-ins are welcome.
