

WHERE YOU ARE SHAPES WHO YOU ARE.

MANITOBA SHAPES INNOVATORS

Meet thirteen graduate students who are on an unprecedented path to discovery and innovation.

The University of Manitoba is located in a province known for its challenging environment, instilling in its people the drive, determination and vision required to create a thriving research university.

These same qualities power our grad students as they seek answers to the questions that are critical for our province, our country and the world. From infectious disease control, to innovative new uses for artificial intelligence – University of Manitoba grad students are leading the way and breaking new ground every day. We invite you to celebrate the discoveries being

made by the next generation of researchers and industry leaders – the finalists of our 2018 Three Minute Thesis challenge. Learn how their drive for discovery and innovation is uncovering a multitude of breakthroughs in an unexpected place – Manitoba.

Take your place and support the next generation of innovators.
