Research Profile: Greg completed his Bachelors and Masters in bioengineering at the University of Louisville, where he worked as a co-op in the Kentucky Spinal Cord Injury Research Center. He is currently a PhD candidate in the Department of Anatomical Sciences and Neurobiology under the supervision of David Magnuson, where he is investigating the biomechanics and pedal forces in a rat model of passive cycling.

All are Welcome to Attend

For more information and zoom problems please contact Dr. Katinka Stecina, Katinka.Stecina@umanitoba.ca
