### Getting Ahead of Dementia: Translating Lifelong Compliance into Good Late Life Health

Sam Gandy, MD, PhD, is Mount Sinai Professor of Alzheimer's Disease Research, Professor of Neurology and Psychiatry, Associate Director of the Mount Sinai Alzheimer's Disease Research Center in New York City, and Chairman Emeritus of the National Medical and Scientific Advisory Council of the Alzheimer's Association. Dr. Gandy is an international expert in the metabolism of the sticky substance called amyloid that clogs the brain in patients with Alzheimer's. In 1989, Gandy and his team discovered the first drugs that could lower formation of amyloid. Dr. Gandy has written more than 150 original papers, chapters and reviews on this topic. Dr. Gandy has received continuous NIH funding for his research on amyloid metabolism since 1986.
