

NEUROSCIENCE TRAINEE LUNCH

VISITING SPEAKER

Thursday, December 13, 2018
1:15 PM

Room 431
Basic Medical Sciences Building

SHAWN HOCHMAN , PH.D.

ASSISTANT PROFESSOR
INTERIM CHAIR OF PHYSIOLOGY
EMORY SCHOOL OF MEDICINE

Dr. Shawn Hochman is Professor and Interim Chair of Physiology at Emory University School of Medicine. His research embraces broad aspects of neuromodulation-based control of sensorimotor and autonomic integration. Current research focuses on emergent dysfunction in mouse models of spinal cord injury. Efforts include; (i) continuous non-invasive capture of changes in physio-behavioral variables in the vivarium home-cage, and (ii) the role of the peripheral NS in driving emergent sensory and autonomic dysfunction.
