# Teaching Improvement Programs

Graduate Students and Post-Doctoral Fellows

The workshop is based on the Teaching Improvement Project System developed by the University of Kentucky in 1975 with grants from the WK Kellogg Foundation. Since 1975, it has reached thousands of educators across Canada and the United States. The University of Manitoba became a program site in 1993 and has made updates in 1999 and 2012. This program is recognized at national and international levels. Participants will receive a certificate of completion at the end of the workshop.

---

## Course Objectives

Following completion of this course, the participants will be able to:

- plan and organize an instructional session in any setting,
- formulate instructional objectives appropriate to their own setting,
- apply presentation techniques in their own setting,
- formulate questions that promote thinking,
- use methods that help students become active participants,
- evaluate their teaching behaviours.

There is no cost to register.
