

Date: November 5, 2022
Attention: All Building Occupants in Area
From: Steve Walker
Re: Asbestos Abatement Notification

Please be advised that a Type 3 asbestos abatement is scheduled to take place after hours on November 7 to 11. Setup will start Monday during the day and after that all abatement work will be after 6:00pm for the rest of the week. This will not affect daily operations of the building. Information regarding the abatement can be found below:

Building:	Plant Sciences		
Location(s):	008A		
Duration of work:	November 7, 2022	to	November 11, 2022
Hours of work:	6 PM	to	5 AM
Project Coordinator:	Steve Walker	Ph.	204-396-6932

A pre-qualified asbestos abatement contractor has been employed for the scope of work. All work is to be performed in accordance with Workplace Safety and Health Regulations for the province of Manitoba, in addition to University standards as outlined in the Asbestos Management Program.

Throughout the abatement, external environmental health and safety consultants as well as University staff will be reviewing the work for compliance purposes. In addition, air monitoring will be performed by the external consulting agency throughout the duration of the project.

It is University practice to remove asbestos containing materials prior to any maintenance or renovation activities which could damage or disturb the material, thus ensuring the safety and health of faculty, staff, students, and visitors.

If you have any questions or concerns regarding the Asbestos Management Program, please contact the Physical Plant Health and Safety Program at 204-396-6932 or 204-293-0300.

This memo is to be distributed to all building occupants whose work space will be directly impacted by the scheduled asbestos abatement work.
