### ***Biological Clocks in Health and Disease***

**Inna Rabinovich-Nikitin, PhD**  
Assistant Professor, Institute of Cardiovascular Sciences  
St. Boniface Albrechtsen Research Centre  
Winnipeg, Manitoba

Dr. Inna Rabinovich-Nikitin's research program focuses on women's heart health, cardiometabolic function and circadian rhythm. Her long-term research interest is to uncover the genes and networks that are associated with both circadian rhythms and metabolic function toward developing innovative therapeutic strategies to treat cardiometabolic dysfunction.

Throughout her career, Dr. Rabinovich-Nikitin published over 35 papers and book-chapters in journals, such as *Circulation*, *Journal of Clinical Investigations*, *Circulation Research* and *Autophagy*. In addition, she was the recipient of many prestigious research awards including "Louis N. and Arnold M. Katz Basic Science Research Prize for Early Career Investigators", "Martha Donovan Women's Leadership Development Award", "International Academy of Cardiovascular Sciences Dr. Roberto Bolli young investigator competition award", and "American Heart Association Dr. Paul Dudley White international scholar award".
