Postdoctoral Fellowship Offer

A one-year Postdoctoral Fellowship is available immediately at Dr. Kushalappa-lab, Department of Plant Science, Faculty of Agricultural & Environmental Sciences, located on the Macdonald Campus of McGill University.

The selected candidate will work on: Gene identification and editing to enhance multiple disease resistance in plants. Eligibility: The candidates should be already staying in Canada, as the Visa and flights from other countries take time. The qualifications required are i) Ph. D. already granted on or after January 2017; ii) strong background on molecular biology and genetics, with some on bioinformatics and possibly on genome editing; iii) Should have proven ability to write scientific papers.

A salary of CAD 36000 and the basic benefits will be provided for one year. This tenure can be renewed for another year depending on your performance and funding availability. Employment is full-time (35 hours per week). A shared office space, access to the research laboratory and McGill library will be provided.

Eligible candidate, please send me electronically a cover letter stating why you are the best candidate, your latest CV and two names of referees who can provide you letters of support, in case required.
