NABC 22: Promoting Health by Linking Agriculture, Food and Nutrition
University of California, Davis
June 16-18, 2010

Visit the [Student Voice page](#) at the NABC website for details of the program and application information.

<http://nabc.cals.cornell.edu/studentvoice/index.cfm>

Application deadline: May 1, 2010

Program:

I. Agriculture, food, and health: the problem and the solution

- Food and nutrition: the good, the bad, and the ugly. Carl Keen (UC Davis)
- Future trends in designing and producing healthy food. Catherine Woteki (Mars, Inc.)
- The American diet: voluntary action vs. government action. Michael Jacobsen (Center for Science in the Public Interest)

II. Food for health successes and prospects

- The pipeline of a new generation of foods. Robert Fraley (Monsanto Co.)
- The mammalian milk genome: knowledge to improve human health through foods. Bruce German (UC Davis)

III. Choosing foods for health

- Social and cultural dimensions of eating habits and health. Charlotte Biltekoff (UC Davis)
- Farm to School: giving kids a healthy choice for lunch. Robert Knight (Old Orange Grove)

IV. Regulatory frameworks for food health claims

- Bringing nutrition science to inform regulations. Joanne Lupton (Texas A&M University)
- U.S. food labeling regulations. Barbara Schneeman (U.S. Food and Drug Administration)
- Trends in European food regulations. Miguel Silva (European Advisory Services)

V. Food for health strategies and programs

- The Alimentary Pharmabiotic Centre: interfacing food and medicine. Fergus Shanahan (University College Cork)
- A national network for advanced food and materials. Rickey Yada (University of Guelph)
- Where will business find the next best food and nutrition innovations? Will Rosenzweig (Physic Ventures)
