

4R Nutrient Stewardship Day hosted by the Soil Ecology Lab at the University of Manitoba

UNIVERSITY
OF MANITOBA

2015
International
Year of Soils

The Soil Ecology Lab (SEL) at the University of Manitoba would like to extend an invitation for you to attend a 4R Nutrient Stewardship Day on Thursday, August 13th at 10:00 am near Rochon Road, just south of Winnipeg. See map below for directions to field site.

On this short field tour attendees will:

- learn about a new Prairie-wide project evaluating fall vs. spring applications of urea & anhydrous ammonia (NH₃).
- learn how enhanced efficiency nitrogen fertilizer (EEF) products can be stacked with fall/spring urea & NH₃.
- discuss when and where 4R nutrient stewardship practices and EEF products are useful.
- see demonstration of a low budget drone for monitoring fields.

Project Sponsors for this Prairie-wide study include the Canadian Fertilizer Institute (CFI), Agriculture and Agri-Food Canada (AAFC) Growing Forward 2, Western Grains Research Foundation (WGRF), Alberta Crop Industry Development Fund (ACIDF), Agrium, Koch Industries LLC, Dow AgroSciences Canada and BASF Canada.

Coffee, drinks and snacks will be provided. Pre-registration is not necessary but please email Kevin.Baron@umanitoba.ca if you plan to attend. We look forward to seeing you!

Directions to 4R Field Site

- From St. Norbert drive south on 75 Highway for 19 km until you reach Glenlea Road.
- Turn west off 75 Highway onto Glenlea Road and drive west for 3 miles.
- Turn right off Glenlea Road onto Rochon Road.
- Drive north on Rochon Road for ~ 1 mile. Field site should be visible.
